

*A new concept in personal protection*

- Private Residences • Commercial and Corporate
- Panic Rooms • Nuclear Shelters • Safe Areas • Security Doors

“ In times of growing uncertainty,  
our bespoke panic rooms, safe rooms  
and nuclear shelters will enable you  
to provide **unrivalled levels of  
protection and security** for your family  
your valuables, your staff, your pupils  
or your guests ”

the  
**panic room**  
company

“ confidence in even the most hostile of situations... ”

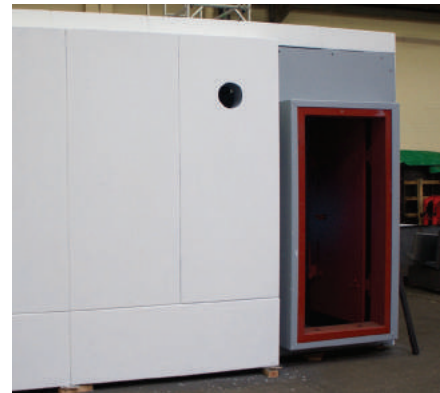

## Our Room

Our Panic Room, or our Safe Room, is the result of more than two decades protecting staff and assets across the UK. Our first secure rooms prevented thieves from attacking ATMs as well as providing a safe environment for Cash in Transit personal whilst replenishing cash nationwide, often in remote locations. Most national banks, supermarkets and

independent ATM deployers have used our secure room solution. Using this expertise and knowledge, we are installing Panic Rooms to protect high net worth individuals and employees worldwide. With a growing list of global partners in possession of a wealth of personal security expertise we can advise, specify, design and install your bespoke Panic Room. Our Panic

Rooms have passed various ballistic tests ensuring that individuals are protected even in the most hostile of situations. Thanks to its unique modular design, the Panic Room can be installed quickly and efficiently in most buildings with minimum disruption. It has the added benefit of being cost-effective since it can be easily relocated when a threat subsides.

“ the ultimate solution to safeguard your family and valued possessions ”

## Private Residence

Our Rooms are designed to give maximum protection and allow instant communication in your hour of need. Our team has been advising on personal and asset protection for over 20 years. This expertise ensures that our Panic Room becomes part of your total security plan to protect you and

your family. We work closely with specialist security companies to design and install your Panic Room and provide an **envelope of protection**. We can also work alongside your interior designer or architect to hide or blend the Room into most environments, whether part of your new build villa in the Mediterranean or converting your

dressling room into a safe haven at home. Each Panic Room is designed to provide maximum protection, from a few hours to several days. All our Rooms have passed several levels of ballistic certification and, after personal consultation, we can advise which specification is required to suit your individual needs.

“ a safe haven for your staff  
when it matters the most ”

## Commercial Corporate

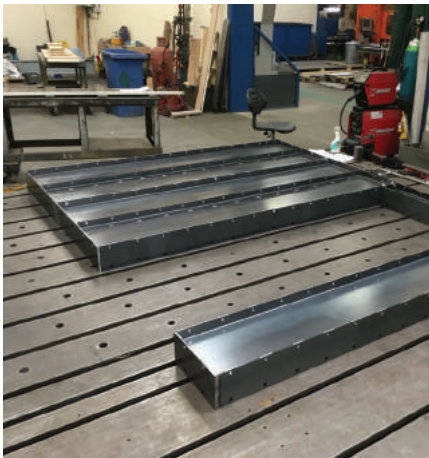

Our Panic Rooms provide a flexible and cost effective solution to the threats which exist in the current world climate. In these uncertain times it has become a priority to protect your workforce at home or abroad. Whether staff are working in a foreign embassy or remote oil and gas fields, our Panic Rooms

can be installed in less than a day. The rooms give a superior solution to older methods which are time consuming to install and hold no guarantees for stopping certain munitions. We can design, supply and install your Room, sustaining life for days with options of blast and fire protection. It can become a

**fully self-sufficient safe haven** with its own independent power and communications. Following three years of research in consultation with specialist military and government agents, our Panic Rooms ensure a safe refuge for your valued staff when it really matters.

“ sectional safe walling is the ideal way to isolate key areas for large groups of people...”

## Safe Areas

Safe Areas can easily be created in embassies, schools, hotels, military compounds and commercial offices. Our sectional safe walling is the ideal way to isolate key areas to provide a secure place for large groups of people. Installation can be delivered with minimum disruption, is highly effective and will save lives in the event of an assassination attempt, a targeted terrorist event

or gun attack. Cost-effective, adaptable and straightforward to implement, the inclusion of these measures will result in enhanced protection and safety for embassy personnel, school pupils & teaching staff and hotel guests and employees alike. Each individual safe area, for example at the end of each hotel accommodation corridor or specified classrooms, is accessed

via a secure door. In the event of a terror attack, just like a fire drill, individuals make their way to the secure safe area and the door would be closed manually. In addition the safe area within an embassy or military compound can also be used as a command & control centre for disaster management further adding to the list of security benefits.

“ our objective is to save lives and  
protect the innocent ”

## Safe Areas for Schools & Colleges

Gun attacks in international schools are devastatingly commonplace. It is our aim to prevent any further loss of life in any educational establishment by implementing safe rooms and safe areas for pupils and teachers to shelter in the event

of a shooter entering the premises. In the first instance, our team of security specialists will carry out a 'threat assessment survey', free of charge, expertly analyse the findings and present a bespoke solution. This could be a combination of

safe rooms, safe areas and secure door sets. Every schools project is different, but the objective is exactly the same: to save lives and protect the innocent.

“ offer guests the ultimate peace of mind when it comes to travel and personal security...”

## Safe Areas for Hotels

Staying in a hotel should be an enjoyable and safe experience, irrespective of location or budget. By investing in the implementation of safe areas, hotels and tour operators can offer their guests the ultimate peace of mind when it comes to travel and personal

security. Sectional safe walling is the ideal way to isolate large areas to provide a secure place for large groups of people. Installation can be delivered with minimum disruption and is highly effective. Each individual safe area, for example at the end of each hotel

accommodation corridor, is accessed via a secure door. In the event of a terror attack, just like a fire drill, guests and staff make their way to the secure safe area and the door would close manually.

“ improving duty of care and enhancing protection & safety for embassy staff ”

# Panic Rooms for Embassies & Consular Buildings

Every embassy worldwide has a duty of care to its personnel. Facing and dealing with terror attacks and assassination attempts is high on any embassy's agenda and we have several ways in which we can assist governments in improving that duty of care to address these

threats. The addition of a panic room within an embassy is one option. This can be combined with the creation of a secure safe areas using sectional walling and secure door sets. Cost effective, adaptable and straightforward to implement, the inclusion of these measures

will result in enhanced protection and safety for embassy staff. They can also be used as a command & control centre for disaster management further adding to their list of security benefits.

“ a specialist solution to provide residential nuclear shelters...” ”

## Nuclear Shelters

Utilising our unique industry knowledge and extensive expertise, we have developed a specialist solution to provide residential nuclear shelters. On an increasingly volatile global political stage, we have recorded a dramatic increase in enquiries in this area.

Our clients demand guaranteed Nuclear, Biological and Chemical (NBC) protection within their own homes for themselves and their family and our bespoke approach more than fulfills this requirement. Working with the world's leading suppliers including Andair, Roxtec

and Temet, we can design, specify and build nuclear shelters based on individual needs and wants. Such shelters offer the ultimate level of protection and life preservation in the event of a nuclear attack and its aftermath.

“ providing a safe and secure external entrance to a property... ”

## Bespoke Security Doors

We have specified and installed a variety of security doors for many clients across the world and, as such, offer a range of ballistic options based on perceived threat. Security doors can deliver a number

of different applications including providing a safe and secure external entrance to a property or creating the ultimate level of protection for a Panic Room fitted internally in a home or office. Used in combination

with our sectional safe walling, selected areas of any building can be transformed into a Safe Room or Safe Area for employees and residents alike.
