CLIENTS FROM ACROSS
THE CONTINENTS COME
TO US FOR PANIC ROOMS,
BALLISTIC-RESISTANT
WINDOWS AND DOORS
AND NUCLEAR SHELTERS.

THE ORIGINAL PANIC ROOM COMPANY.

Established in 2010, we were the first British company to design, manufacture and install bespoke panic rooms. Little did we know how sought-after they would become. As the years have passed, the world has become increasingly volatile, and our product range has adapted to serve this new unpredictable era.

The Panic Room Company – giving you confidence for even the most hostile environments.

PANIC ROOMS FOR PRIVATE RESIDENCES

The panic room has become an essential for high-net-worth families and celebrities - especially during these uncertain times.

The panic room has become an essential for high-net-worth families and celebrities - especially during these uncertain times.

A panic room provides a secure retreat for you and your loved ones in the event of armed robbery, attempted kidnap, or assassination. The protected space affords you the time and capability to summon third-party assistance - safely out of harm's way until law enforcement arrive. They also serve as an impenetrable vault for an art or jewellery collection.

PANIC
ROOMS ARE
INSTALLED
RAPIDLY WITH
LITTLE
DISRUPTION

Working alongside interior designers and architects, our panic room is tailor-made to your surroundings. It could take shape as an unobtrusive fortified walk-in closet or bathroom, or occupy a designated space in a new-build property – adapting seamlessly to existing fabrics and décor. All rooms pass several levels of ballistic certification, while air-filtration systems, and independent power and communications ensure life can be sustained for several hours – days if necessary.

By virtue of modular construction techniques, panic rooms are installed rapidly with little disruption and, should the need arise, be just as easily dismantled and relocated.

A photograph of a riot scene. In the foreground, a person with their back to the camera has their hands raised in the air. They are wearing a dark jacket. In the background, riot police in helmets and shields are moving down a city street. There is a fire burning on the street, and a white van is visible. The scene is chaotic and filled with smoke and fire.

SAFE AREAS FOR COMMERCIAL/ CORPORATE SPACES

Our self-sufficient panic rooms benefit from independent power supplies, standalone communication systems and sophisticated air filtration.

In the present climate, threats to our safety can come in many different guises.

Whether it be a targeted terror attack on an embassy, a violent city centre riot or a seemingly random shooting at a college, having a safe space as a retreat can be the difference between life and death.

Using a flexible combination of panic rooms, secure sectional walling and ballistic-resistant doors, our cost-effective solutions are suitable for the likes of:

Places of Work

Educational Facilities

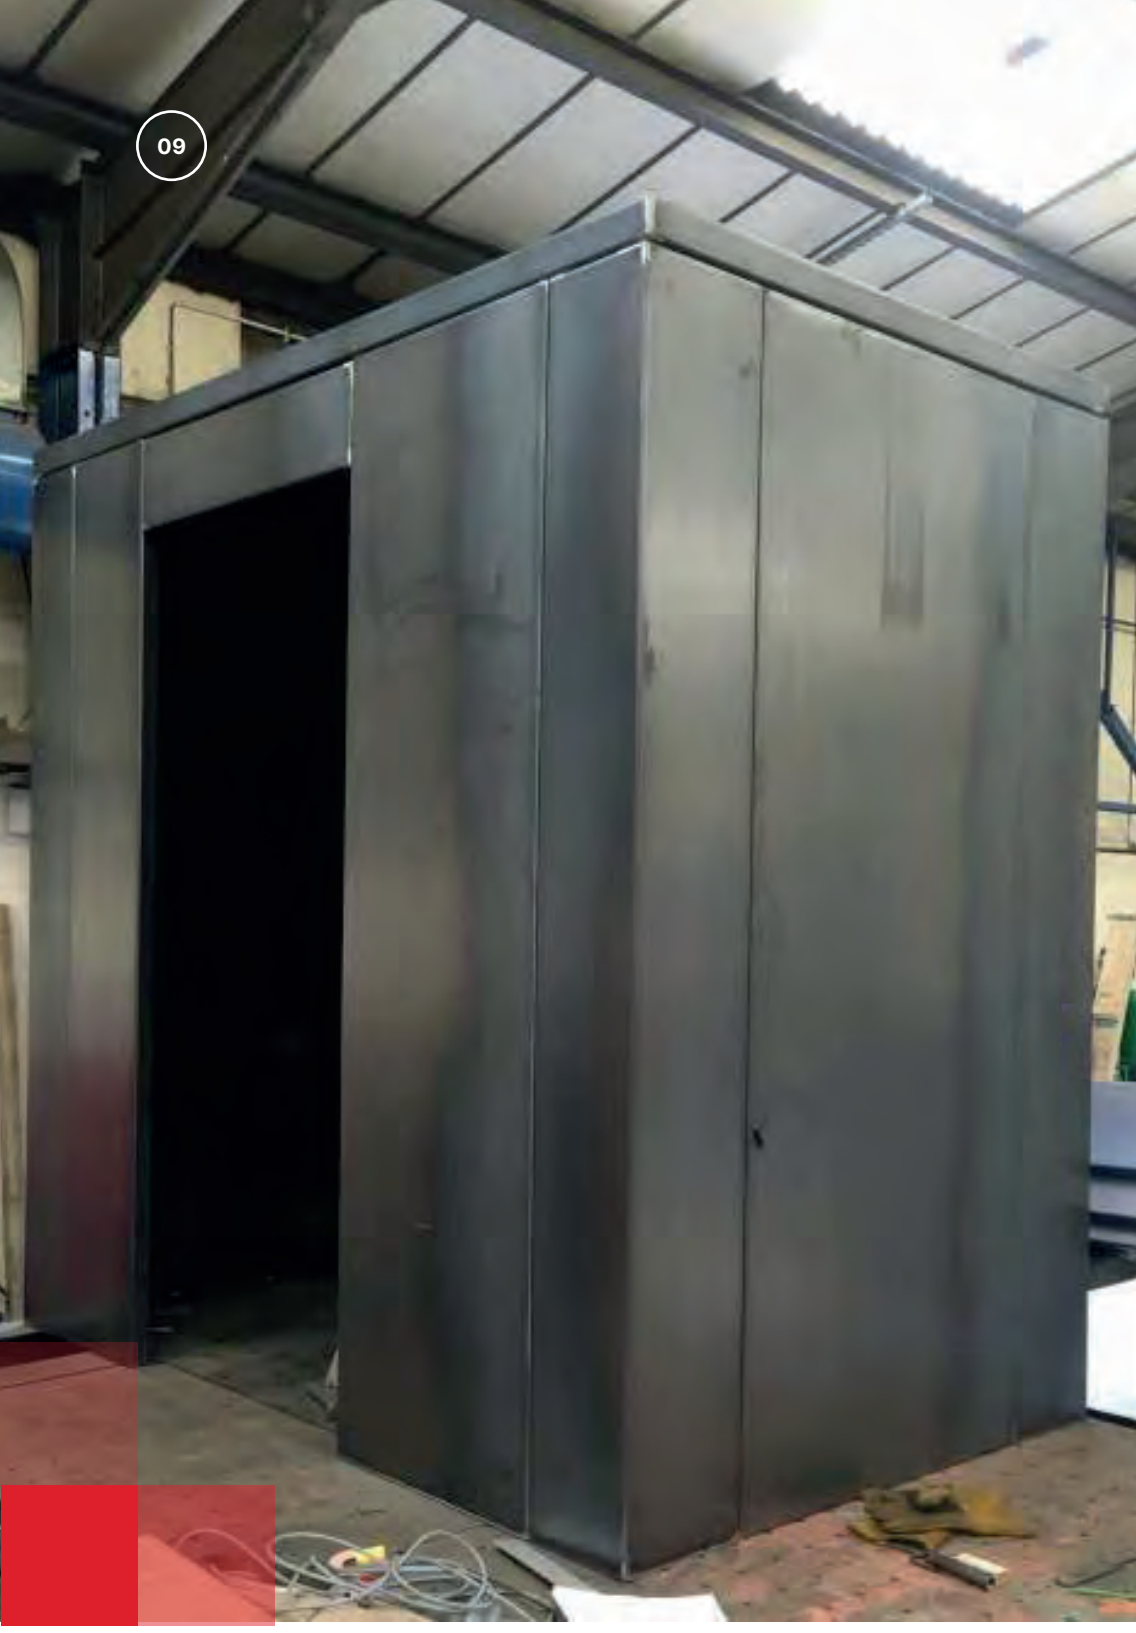

Hotels

Residences

Embassies and Consulates

Entertainment Venues

Our self-sufficient panic rooms benefit from independent power supplies, standalone communication systems and sophisticated air filtration, and can sustain life for several days. With the option of ballistic, blast and fire protection, these safe havens can also perform the function of command-and-control centres for disaster management.

Designed in-house and manufactured off-site, our panic rooms are often installed in less than a day with minimal disruption to routines. The team can also fabricate secure sectional walling and ballistic-resistant doors to rapidly isolate key areas of the building. Our solutions are far superior to traditional fortified spaces, which often require a cumbersome and disruptive installation process yet offer no guarantees for stopping certain munitions or devices.

With years of experience collaborating with specialist military and government personnel, we are confident that we can supply a refuge for you, and those around you, for the time it matters the most.

NUCLEAR SHELTERS

Confronted by an increasingly uncertain new world, an upgrade from the panic room is the nuclear shelter.

MOST
COUNTRIES
ARE ILL-PREPARED
TO PROTECT
THEIR
CITIZENS

thepanicroomcompany.com

Confronted by an increasingly uncertain new world, an upgrade from the panic room is the nuclear shelter.

Thanks to relentless geopolitical instability, experts claim we are closer to WW3 than at any point since the 1970s and with that comes the threat of nuclear, biological or chemical (NBC) attack. With the exception of organized nations such as Switzerland, most countries are ill-prepared to protect their citizens for this improbable, but possible, eventuality. The responsibility, therefore, lies with the individual. This is a brief that traditional builders and constructors cannot fulfil – we can.

THE ULTIMATE LEVEL OF PROTECTION AND LIFE PRESERVATION

Working with market leaders in NBC air filtration, sealing solutions, and blast protection, The Panic Room Company custom-builds NBC shelters based on personal requirements. With breathable air, drinkable water, a power supply, hygiene solutions, and stocks of food, the resulting shelter offers the ultimate level of protection and life preservation – during the attack and in its aftermath.

ANDAIR FILTRATION

A toxin-free environment

As the official UK partner for Andair – a privately-owned Swiss company specialising in nuclear shelter technology – we offer sector-leading solutions for NBC air filtration.

Adaptable to large and small shelter spaces, Andair systems filter incoming air that could be contaminated with nuclear, biological and chemical agents and particles.

Andair AG

Regardless of whether these impurities are the result of a direct terror attack, an industrial accident, or a natural disaster, Andair filters will guarantee a toxin-free environment, whilst also delivering a continual supply of fresh oxygenated air to prevent an equally dangerous build-up of carbon dioxide within the shelter.

BALLISTIC-RESISTANT WINDOWS & DOORS

Rigorously tested and internationally certified, our ballistic-resistant windows and doors offer an additional layer of residential security.

Rigorously tested and internationally certified, our ballistic-resistant windows and doors offer an additional layer of residential security. Designed to withstand various forms of impact - from bullets to ram-raids and heavy-duty hammers to projectiles - intruders will find it extremely difficult to gain access via these typical entry points.

AVAILABLE IN A RANGE OF
STYLES, FINISHES AND
DESIGNS, HOMEOWNERS
CAN MATCH WINDOWS
AND DOORS TO
AESTHETIC PREFERENCES
WITHOUT COMPROMISING
ON PERFORMANCE.

Particularly suited to high-crime areas or regions prone to civil unrest, these durable doors and windows act as a deterrent to criminals creating peace of mind for you, your family, and your valued possessions. As a bonus, they also tolerate extreme weather conditions, have excellent noise-reducing qualities, enhance household energy efficiency and could attract lower insurance premiums.

THE PANIC ROOM COMPANY –
GIVING YOU CONFIDENCE FOR EVEN
THE MOST HOSTILE ENVIRONMENTS.
